A volume in the series **Industrial Information Technology**
Series edited by Richard Zurawski, ISA Corporation, Alameda, California, USA

UNPRECEDENTED COVERAGE from LEADING AUTHORITIES

Electronic design automation (EDA) is among the crown jewels of electrical engineering. Without EDA tools, today's complex integrated circuits (ICs) would be impossible. Doesn't such an important field deserve a comprehensive, in-depth, and authoritative reference? The **Electronic Design Automation for Integrated Circuits Handbook** is that reference, ranging from system design through physical implementation. Organized for convenient access, this handbook is available as a set of two carefully focused books dedicated to the front- and back-end aspects of EDA, respectively.

What's included in the Handbook?

EDA for IC System Design, Verification, and Testing

This first installment examines logical design, focusing on system-level and micro-architectural design, verification, and testing. It begins with a general overview followed by application-specific tools and methods, specification and modeling languages, high-level synthesis approaches, power estimation methods, simulation techniques, and testing procedures.

EDA for IC Implementation, Circuit Design, and Process Technology

Devoted to physical design, this second book analyzes the classical RTL to GDS II design flow, analog and mixed-signal design, physical verification, analysis and extraction, and technology computer aided design (TCAD). It explores power analysis and optimization, equivalence checking, placement and routing, design closure, design for manufacturability, process simulation, and device modeling.

Comprising the work of expert contributors guided by leaders in the field, the **Electronic Design Automation for Integrated Circuits Handbook** provides a foundation of knowledge based on fundamental concepts and current industrial applications. It is an ideal resource for designers and users of EDA tools as well as a detailed introduction for newcomers to the field.

Features

- Presents the most comprehensive coverage of all major areas of EDA for ICs in a conveniently organized two-volume format
- Divides coverage into front-end and back-end aspects of the EDA process, with one book devoted to each
- Provides an introduction and a summary of the state of the art in each chapter, perfect for novices and experts alike
- Includes extensive references to current literature as well as numerous illustrations, including an eight-page full-color insert, to reinforce the concepts

Contents

EDA FOR IC SYSTEM DESIGN, VERIFICATION, AND TESTING

Introduction
System Level Design
Micro-Architecture Design
Logical Verification
Test
Index

EDA FOR IC IMPLEMENTATION, CIRCUIT DESIGN, AND PROCESS TECHNOLOGY

RTL to GDS-II, or Synthesis, Place and Route
Analog and Mixed Signal Design
Physical Verification
Technology CAD
Index

Electronic Design Automation for Integrated Circuits Handbook

Other Titles of Interest

DIGITAL INTEGRATED CIRCUITS

ANALYSIS AND DESIGN

John E. Ayers

UNIVERSITY OF CONNECTICUT, STORRS, USA

"...Ayers discusses a wide range of topics—each properly arranged, concisely explained, and clearly presented. He offers a learn-by-doing approach using chapter laboratory exercises and problems. These exercises together with the bibliography help readers deepen their understanding and widen their views of digital integrated circuits, making the book ideal for either a classroom resource or for independent study ... Summing Up: Recommended."

Catalog no. 1951, 2004, 720 pp.
ISBN: 0-8493-1951-X, \$79.95 / £31.99

EMBEDDED SYSTEMS HANDBOOK

Edited by

Richard Zurawski

ISA CORPORATION, ALAMEDA, CALIFORNIA, USA

NEW!

"...Each section of [the Embedded Systems Handbook] lays out both the core principles and fundamental wisdom of the section topic, as well as discussing areas of recent innovation. ...Zurawski has done a good job given the scope of the topic [the book] addresses. The book broadly covers embedded systems and also delves deeply into specific new areas of interest. ...[It] will indisputably be valuable to many different readers. ...a valuable tool offering something to almost everyone in the field."

—IEEE Design & Test of Computers

Catalog no. 2824, January 2006, 1160 pp.
ISBN: 0-8493-2824-1, \$139.95 / £79.95

THE INDUSTRIAL ELECTRONICS HANDBOOK

Bestseller!

J. David Irwin

AUBURN UNIVERSITY, ALABAMA, USA

This best-selling reference brings together all of the topics important in electronics, system and process control, factory communications, measurement and instrumentation, circuits and devices, hardware, software, and factory automation. Expertly written, critically reviewed, and masterfully compiled, this bestselling handbook is an indispensable reference for engineers working with applications of electronic and electrical systems, apparatus, circuits and devices, process control, and industry equipment.

Catalog no. 8343, 1997, 1728 pp.
ISBN: 0-8493-8343-9, \$159.95 / £92.00

EMBEDDED SYSTEMS HANDBOOK

.....Catalog no. 2824, ISBN: 0-8493-2824-1 at \$139.95 / £79.95 each.

THE INDUSTRIAL ELECTRONICS HANDBOOK

.....Catalog no. 8343, ISBN: 0-8493-8343-9 at \$159.95 / £92.00 each.

Ordering Information: Orders must be prepaid or accompanied by a purchase order. Checks should be made payable to CRC Press. Please add the appropriate shipping and handling charge for each book ordered. All prices are subject to change without notice. If purchasing by credit card please be sure to include the 3 digit security code that appears on the back of your card in the "sec code" field provided below. **U.S./Canada:** All orders must be paid in U.S. dollars. TAX: As required by law, please add applicable state and local taxes on all merchandise delivered to CA, CT, FL, KY, MO, NY, and PA. For Canadian orders, please add GST. We will add tax on all credit card orders. **European Orders:** All orders must be paid in U.K. £. VAT will be added at the rate applicable. **Textbooks:** Special prices for course adopted textbooks may be available for certain titles. To review a book for class adoption, contact our Academic Sales Department or submit your textbook evaluation request online at www.crcpress.com/eval.htm **Satisfaction Guaranteed:** If the book supplied does not meet your expectations, it may be returned to us in a saleable condition within 30 days of receipt for a full refund.
